

head protection CAPO **VARIO Soft**

... light protection,
comfortable and
convenient!

head protection CAPO VARIO Soft

... made of fabric - safe and comfortable

The proven CAPOVARIO Soft series is designed to protect against head injuries during uncontrolled and unsafe movements that can lead to a high potential for injury.

The head protection helmet is made of cotton fabric and padded with a special integral foam. In addition, a foil has been incorporated which considerably improves the impact resistance of the safety helmet.

The velcro-on forehead and neck protectors allow the head protection to be optimally adapted to the existing needs. The helmet is available in three colours (grey, red, blue) and in five sizes. The dimensions of the individual sizes can be taken from the table on the order sheet.

A prerequisite for the optimum safety of a head protection helmet is the exact fit. Therefore, the head circumference of this model can be adjusted by approx. 4 - 5 cm for each size. In addition, you can adjust the crown according to the circumstances. It's light weight and good fit ensure optimal wearing comfort.

The harness system has been improved, as the ratio of the Y-straps to each other can now be changed and thus adapted to the size and position of the ears.

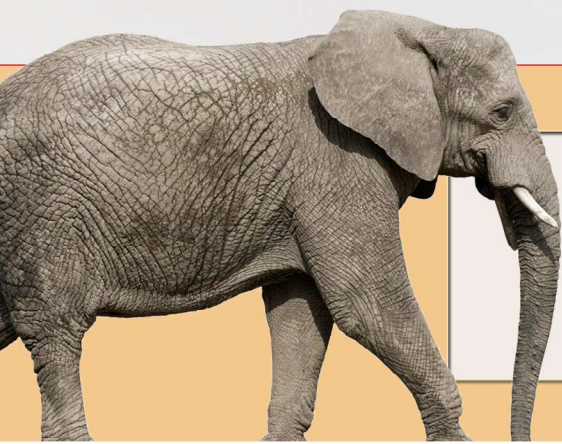

head circumference adjustable

new belt system:
ratio of both y-belts
variable

top side available
in 2 versions:
„lamellas“ or „crossed“
